

# Mixed Form to Fraction Form

Introducing:

- mixed fraction
- fraction form
- Improper fraction

WHOLE OR MIXED FORM

$$1 \frac{2}{3}$$

TO FRACTION FORM

$$= \frac{5}{3}$$

# Mixed Form To Fraction Form 1

WHOLE OR MIXED FORM

$$1 \frac{2}{3}$$

TO FRACTION FORM

$$= \frac{5}{3}$$

This picture shows the fraction  $1 \frac{2}{3}$ . The complete circle on the left is selected and  $\frac{2}{3}$  of the other circle is selected. A fraction such as  $1 \frac{2}{3}$  that has a whole number part and a fraction part is a *mixed fraction*.

# Mixed Form To Fraction Form 2

WHOLE OR MIXED FORM

$$1 \frac{2}{3}$$

=

$$\frac{1 \times 3 + 2}{3}$$

TO FRACTION FORM

$$= \frac{5}{3}$$

Every whole number or *mixed fraction* can be written in *fraction* ( $\frac{a}{b}$ ) form. You can calculate the *fraction form* for  $1 \frac{2}{3}$  by multiplying the whole number 1 by the denominator 3 and then adding the numerator 2 for a numerator of 5 in the *fraction form*.

# Mixed Form To Fraction Form 3

WHOLE OR MIXED FORM

$$1 \frac{2}{3}$$

=

$$\frac{1 \times 3 + 2}{3}$$

=

$$\frac{5}{3}$$

TO FRACTION FORM

The picture shows that there are 5 one-third units or  $\frac{5}{3}$ .

Also, you can think of the unit 1 as  $\frac{3}{3}$ . Add  $\frac{3}{3}$  to the partial unit  $\frac{2}{3}$  for the *fraction form*  $\frac{5}{3}$ . This picture shows that  $1 \frac{2}{3} = \frac{3}{3} + \frac{2}{3} = \frac{5}{3}$ .

Some texts call the fraction form an *improper fraction*. This is misleading because there is nothing improper about  $\frac{5}{3}$ .

# Mixed Form To Fraction Form 4

WHOLE OR MIXED FORM

$$1 \frac{2}{3}$$

=

$$\frac{1 \times 3 + 2}{3}$$

TO FRACTION FORM

=

$$\frac{5}{3}$$

The same amount,  $1 \frac{2}{3}$ , is shown with a number line.

# Mixed Form To Fraction Form 5

WHOLE OR MIXED FORM

$$3 \frac{1}{4}$$

=

$$\frac{3 \times 4 + 1}{4}$$

TO FRACTION FORM

=

$$\frac{13}{4}$$

The amount shown at the arrow can be written as  $3 \frac{1}{4}$  or  $\frac{13}{4}$ . Notice that there are 13 marks from zero to the arrow.

# Mixed Form To Fraction Form 6

WHOLE OR MIXED FORM

$$2 \frac{5}{8}$$

TO FRACTION FORM

$$= \frac{21}{8}$$

Multiply the whole number 2 by the denominator 8.  
Then add the numerator 5 for the fraction numerator 21.

This picture shows the *mixed fraction*  $2 \frac{5}{8}$ . If you were to count all the parts that are colored you would have a total of 21 parts, giving the numerator for the fraction  $\frac{21}{8}$ .

# Mixed Form To Fraction Form 7

WHOLE OR MIXED FORM

$$2 \frac{5}{8}$$

TO FRACTION FORM

$$= \frac{21}{8}$$

Multiply the whole number 2 by the denominator 8.  
Then add the numerator 5 for the fraction numerator 21.

Since each unit or circle has 8 parts, each completely colored circle can be written as  $\frac{8}{8}$ . This gives us  $\frac{8}{8} + \frac{8}{8} + \frac{5}{8}$  circles for  $\frac{21}{8}$  circles.

# Mixed Form To Fraction Form 8

WHOLE OR MIXED FORM

TO FRACTION FORM

$$2 \frac{5}{8} = \frac{2 \times 8 + 5}{8} = \frac{21}{8}$$

Multiply the whole number 2 by the denominator 8.  
Then add the numerator 5 for the fraction numerator 21.

Or you can multiply the whole number 2 times the denominator 8 and then add the numerator 5 for a numerator of 21 in the *fraction form*.

# Mixed Form To Fraction Form 9

Whole Number Form to Fraction Form.

$$4 = \frac{4 \times 1 + 0}{1} = \frac{4}{1}$$

To write the whole number 4 in *fraction form* simply write the whole number 4 over the denominator 1.

# Mixed Form To Fraction Form 10

$$3 \frac{3}{5} =$$

What is in  $3 \frac{3}{5}$  fraction form?

# Mixed Form To Fraction Form 11

WHOLE OR MIXED FORM

TO FRACTION FORM

$$3 \frac{3}{5} = \frac{3 \times 5 + 3}{5} = \frac{18}{5}$$

Multiply the whole number 3 by the denominator 5.  
Then add the numerator 3 for the fraction numerator 18.

# Mixed Form To Fraction Form 12

What is in 3 fraction form?

# Mixed Form To Fraction Form 13

WHOLE OR MIXED FORM

$$3 \frac{0}{1}$$

=

$$\frac{3 \times 1 + 0}{1}$$

=

$$\frac{3}{1}$$

TO FRACTION FORM

Multiply the whole number 3 by the denominator 1.  
Then add the numerator 0 for the fraction numerator 3.
